

Dear customers and friends of the beautiful Maccaferri -Selmer guitars

## 1. Guitar tuners

As some of you already know, I stopped production with the latest serie of Miller guitar tuners. Sad? Don't have to be, because the good news comes here: it goes on!

And how?

**Ari-Jukka Luomaranta of AJL guitars in Finland** has been a good customer of mine for years. For some time now he has been building the tuners for his guitars on his own, quasi under licence. It was obvious that Ari would continue the production as well as the distribution of this product. Of course, I am very pleased!

What's the difference?

- The logo changes to the one Ari has been using for AJL-guitars since we started working together. Same style, different letters
- Order tuners at AJL <https://www.ajl-guitars.com/>

## 2. Tails

are still in stock, but here too there will be a change. I will inform you in due time

## 3. Pickups

continue to run

## 4. Single parts and accessories

for tuners and tails as well as picks are available as long as stock lasts

I would like to take the opportunity to thank everyone for their long-term cooperation and the confidence they have shown in me. It was a lot of fun! I am happy that my gearboxes have found their way into the wide world of the gypsyjazz guitar community!!

warm regards  
Rainer
